

STAT118 Assignment 1

Due date: Friday, September 4, 2026 at 5 PM ET

Purpose

This assignment reviews math skills we will use throughout the course. It's meant to help identify which topics feel comfortable and which may need review early on. **If this assignment feels challenging, please reach out so we can talk about support options.**

Grading

This assignment is graded on completion and effort, not accuracy. Homework is a place to practice, make mistakes, and figure out what you need help with before exams.

The assignment will be graded as follows:

- **2 points: Complete**
 - Good-faith work is shown on all problems. That is, your thinking is clearly shown through steps, calculations, and/or brief explanations.
- **1 points: Partially complete**
 - Good-faith work is shown on at least 50% but fewer than 100% of problems.
- **0 points: Not complete**
 - Good-faith work is shown on fewer than 50% of problems, OR
 - Assignment turned in after the grace period.

Name:

Section (check one): ☐ MWF 12 pm ☐ MWF 1pm

1. Evaluate the expression below. Round your final answer to 2 decimal places.
Remember your order of operations!

$$\frac{3(120 - 10)}{5}$$

2. Evaluate the expression below. Round your final answer to 2 decimal places.
Remember your order of operations!

$$\frac{105 - 110}{\sqrt{\frac{3^2}{12} + \frac{2^2}{10}}}$$

3. Solve the following equation for x.

$$5 = \frac{x + 60}{2}$$

4. Solve the following equation for x. Round your final answer to 2 decimal places.

$$\frac{2x - 8}{6} = 10$$

5. The following number is written in scientific notation. Write it in standard decimal notation.

6.52E-3

6. The following number is written in scientific notation. Write it in standard decimal notation.

7.38E2

7. Write the fraction below as 1) a decimal and 2) a percent. Round each answer to two decimal places, e.g., 0.23 and 23.07%.

$\frac{1}{6}$

8. You collected data on 72 Simmons students and found that 8 students were left-handed. What proportion of the students you surveyed are left-handed? Write your final answer as a decimal rounded to 2 decimal places.

9. A study found that 33 out of 105 teenagers had admitted to texting and driving. What proportion of the teenagers you surveyed text and drive? Please write your final answer as a decimal rounded to 2 decimal places.

10. A survey of local high school students found that 25% of them plan to attend a four-year university after graduation. If there are 840 students at the high school, how many students would you expect to plan on attending a four-year university?
